

A builder that tailors both look and lifestyle, custom new builds and renovations achieve new heights with GrandScape Homes catering to each client's unique vision of home. "We'll help you translate your desires into a beautifully executed masterpiece," share Tony and Lina Ribocco of GrandScape, who brings their design to life or can work with your designer/architect to execute personal flair with flawless construction.

Prado Milton Grey paving stone circles the weathered iron fire bowl that lights the way for guests amidst a variety of trees, shrubs, and perennials for mixed texture and all season colour. The façade hosts a blend of natural sandstone with Iron Gray Hardiboard and smooth acrylic stucco surrounding metal clad windows. Douglas Fir gables and trim details complement a red balau batu wood deck and stairs that lead to the custom walnut front entry.

Sweeping planting beds visually capture the areas surrounding the home to the stunning ravine, which borders the property. A water feature and pathway hugs the natural slope down to the walk-out patio. Manitoba limestone retaining walls capture spruce, cherry trees, native roses, irises, and lilies.
